

Choosing the Right Plants: A Buyer's Guide

Native plants can remedy a specific landscape problem or help you meet a landscape goal. Listed below are examples of some common landscape problems and objectives and the native plants that can remedy them. The plants listed here are the species we will have available for purchase during our plant sale. Additional informational materials will be available on site during the sale. For more information, go to the Washington Native Plant Society's website: <http://www.wnps.org/landscaping/herbarium/index.html>
